## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 17-18 and 31-33 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

These claims are directed to a process, which recites an abstract idea. This recitation falls within Section 101 Judicial exceptions - Abstract Ideas.

The claims are directed to a judicial exception; as such, pursuant to the Interim Guidelines on Patent Eligible Subject Matter (MPEP 2106), the claims must have either physical transformation and/or a useful, concrete and tangible result. In making this determination, the focus is not on whether the steps taken to achieve a particular result are useful, tangible, and concrete, but rather on whether the **final result** achieved by the claimed invention is “useful, tangible, and concrete”. The claims fail to include transformation from one physical state to another in the final step. Although, the claims appear useful and concrete, there does not appear to be a tangible result claimed. Merely determining would not appear to be sufficient to constitute a tangible result, since the outcome of the determining step has not been used in a disclosed practical application nor made available in such a manner that its usefulness in a disclosed practical application can be realized. As such, the subject matter of the claims is not patent eligible.

Since the last step in claims 17 and 31 are not tangible, the entire claim is deemed to not comply with subject matter eligibility requirements. Furthermore, since dependent claims 18, and 32-33 do not solve the deficiency of independent claims 17 and 31 they are also rejected under 35 U.S.C. 101.

### *Allowable Subject Matter*

Art Unit: 2877

Claims 1, 3, 6-7, 9-16, 21-30, and 34-40, are allowed over the prior art of record for the reasons set forth in the previous Office Actions (paper numbers 0306, 031706, and 20060803).

***Response to Arguments***

Applicant's arguments filed October 31<sup>st</sup>, 2006 have been fully considered but they are not persuasive. Determining, within a processor, defines an abstract idea. Since the determining step has not been used in a disclosed practical application nor made available in such a manner that its usefulness in a disclosed practical application can be realized (i.e. storing or displaying the results of the determination, performing a function based on the determination, etc.), there does not appear to be a tangible result claimed. Therefore, the subject matter of the claims is not patent eligible.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
